

NET'DEX

CLEANER FOR ELECTRIC CONTACTS

DEFINITION

Cleaner for removing oxidation from electric contacts that are disconnected from power source.

ADVANTAGES

- Prevents formation of electric arcs and leakage current
- Cleans all contacts quickly
- Does not leave a greasy film
- Does not harm materials used in electronics

APPLICATION FIELDS

Cleaning all electrical mechanisms that have been disconnected from power source, keyboards, potentiometers, jacks, potentiometer wipers, pin head adaptors, connectors, etc.

TECHNICAL CHARACTERISTICS

Odour	solvent
Density	0.7
KB Index	35
Flash point	<12°C

INSTRUCTIONS FOR USE

Spray onto the contacts from which oxidation is to be removed, and allow product to work. Allow to dry before reconnecting to power source.

PACKAGING

650 ml aerosol	ref. 4501A4	x 12
5 L jerry-can	ref. 2501 J1	x 4
200 liters DRUM	ref. 2501 U2
